Each Vessel Registration Form shall indicate the owner of the Designated Vessel, the appointed Captain, and all Eligible Anglers on its Team.

3.02 Registration for the Event closes upon the registration of three hundred (300) Eligible Anglers or sixty (60) Designated Vessels. Event registration is only complete upon all Eligible Anglers on a Team receiving a Certificate of Entry Number from the Event Coordinator. 3.03 Upon receiving a Certificate of Entry Number, all Eligible Anglers shall fish for Eligible Catches in the Hatteras Cup and/or Hatteras Fishing Challenge divisions until the Closing Date.

3.04 Participants shall submit Proofs to the Event Coordinator in order to be considered as a recipient of any Prize. All Eligible Catches must be caught in compliance with all local, state, and federal laws, and the IGFA International Angling Rules. Any fish caught or captured illegally or in violation of the IGFA International Angling Rules will immediately be disqualified, and will not be acknowledged as an Eligible Catch. All caught fish must be kept on ice (but cannot be frozen) at all times. The use of salt or any other preservative is not allowed. Any fish that is altered (by stuffing, injection, etc.) by any means will be immediately disqualified. Mutilated fish will be disqualified.

3.05 In the case of submissions for the Hatteras Cup only, the Event Coordinator will receive the Proofs and will conduct an investigation with the assistance of independent third party adjusters to certify that an Atlantic Blue Marlin exceeding the World Record weight, by at least one half of one percent, has been caught by an Eligible Angler on a Designated Vessel in Designated Waters, in order for the Hatteras Cup to be awarded. Any Eligible Catch must be weighed-in and reported per all the requirements and stipulations of the IGFA International Angling Rules for the fish to be properly recorded as a winning catch. No prize will be awarded until the Event Coordinator and an independent third party adjuster has officially determined and recognized the catch as exceeding the IGFA World Record for weight.

3.06 All Eligible Catches must be officially weighed-in at the marina where Owner's Designated Vessel is docked. The Weighing Requirements are as follows:

- All potential record fish should be weighed on scales that have been checked and certified for accuracy by government agencies or other qualified and accredited organizations. Disinterested witnesses to the weight should be used whenever possible. All scales must be regularly checked for accuracy and certified in accordance with applicable government regulations at least once every twelve months. If at the time of weighing the fish the scale has not been properly certified within twelve months, it should be checked and certified for accuracy as quickly as possible. An official report stating the findings of the inspection prior to any adjustment of the scale must be included with any claim.
- The weight of the sling, platform, or rope (if one is used to secure the fish on the scales) must be determined and deducted from the total weight.
- At the time of weighing, the actual tackle used by the angler to catch the fish must be exhibited to the weighmaster and weight witness.
- No estimated weights will be accepted as proof of claim. Fish weighed only at sea or on other bodies of water will be INELIGIBLE for the prize covered

by this contract.

- Only weights indicated by the graduations on the scale will be accepted. Visual fractionalizing of these graduations is not allowed. Any weights that fall between two graduations on the scale must be rounded to the lower of the two.
- EIIC reserves the right to require any scale to be re-certified for accuracy if there are any indications that the scale might not have weighed correctly.

3.07 All Eligible Catches must be photographed with official weigh-in while on the scale and confirmed via photograph at the marina. The catch must outweigh the existing IGFA all-tackle world record by a replacement weight of at least one half of one percent more than the existing IGFA World Record. Photographs showing the full length of the fish, the rod and reel used to make the catch, and the scale used to weigh the fish must accompany any claim. A photograph of the Eligible Angler with the fish is also required. For species identification, the clearest possible photos should be submitted. In all cases, photographs should be taken of the fish in a hanging position and also lying on a flat surface on its side. The fish should be broadside to the camera and no part of the fish should be obscured. The fins must be fully extended and not obscured with the hands, and the jaw or bill clearly shown. When photographing a fish lying on its side, the surface beneath the fish should be smooth and a ruler of marked tape placed beside the fish if possible. Photographs from various angles are most helpful. An additional photograph of the fish on the scale with actual weight visible will help expedite the claims process. No weight may be added to any fish in any manner. Any attempt to alter the actual weight of any fish in any manner will immediately disqualify that Eligible Angler from this contest and from any Prize award covered by this contract.

3.08 All Proofs of Eligible Catches must be reported by the Owner of the Designated Vessel to the Event Coordinator within twelve (12) hours of the catch.

3.09 Prizes will be awarded based upon the weight of Eligible Catches, or in the case of the Catch & Release Division, an accumulation of the most number of points.
